COREZA
PRINT

A smarter way
to manage print
in the cloud.

Coreza Print enables organizations to deploy, secure, control, and track print through a cloud-first platform designed to eliminate infrastructure complexity, strengthen security, and give teams full visibility into how print is used across the organization.

Simple. Secure.
Cloud-based
print management.

Cloud-native

Cloud-native print management and monitoring solutions that don't require any on-premises hardware or data collection agent.

Reduced IT burden

Cloud print management reduces day-to-day IT management and maintenance.

Future-proof

Leverages scalability, flexibility, cost-efficiency, and enhanced security of the cloud.

Easy to deploy

Serverless print management built around a universal print driver to ease deployment without feature compromise.

Vendor-agnostic

Compatible with all printer makes and models, including receipt (POS) and label printers.

COREZA PRINT

Take print to the cloud.

Designed to reduce the complexity of print management, Coreza Print helps organizations automate time-intensive tasks like printer allocation, driver deployment and updates, default settings, print policies, document security, queue monitoring, access control, and user management—all from one cloud-managed pane of glass.

Device Radar
Automatically onboards network-connected devices and applies AI-powered configuration to set optimal defaults and enable advanced finishing where available.

Cross-platform support
Supports ChromeOS™/Chromebook™ devices, macOS®, and Windows®, with integration into Google Workspace™ and Microsoft 365®.

Edge Print
Built on a zero-trust security architecture, enabling secure printing outside the corporate network while maintaining full administrative control.

Powerful insights
Delivers real-time analytics and reporting to help identify inefficiencies, reduce waste, and lower printing costs.

Universal Print Driver
Eliminates the need for multiple printer drivers and enables zero-touch deployment at scale without sacrificing advanced finishing, secure print, or native accounting features.

Directory Sync
Supports Google Workspace™ and Microsoft Azure® authentication, single sign-on, and user provisioning, with a proprietary internal directory for flexible deployment.

Intuitive end-user experience
Provides a consistent and intuitive user experience across devices and operating systems.

Built-in security
Protects users, documents, and data through cloud-native security controls.

chrome enterprise   Google Workspace   Microsoft Azure

Print management, monitoring, and access control.

Coreza Print delivers vendor-agnostic print management, monitoring, and access control in one powerful platform.

Designed to support mixed-device environments, Coreza Print enables secure, cloud-based print management across diverse printer fleets—without the need for on-premises servers.

Additional embedded integrations are available for select manufacturers, including Toshiba®, Sharp®, and RISO®, enabling authentication, usage tracking, and access control on supported devices through native platform capabilities.

COREZA PRINT

Block unauthorized access
Secure authentication through Google Workspace™, Microsoft 365®, and the internal directory.

Quota management
Apply user-, group-, or organizational-unit-based quotas with configurable budget cycles.

Reduce printer downtime and support tickets
Gain a comprehensive overview of fleet performance, device status, supplies, and counters to proactively resolve issues before they impact users.

Data-driven decision making
Advanced analytics provide visibility into printing behavior and usage patterns to support cost reduction and sustainability initiatives.

Cloud-based pull printing
Print jobs are securely held in the cloud until users authenticate at the device.

Track and manage usage
Monitor print, copy, and scan activity, enforce mono-only printing rules, and reduce color usage to control costs and environmental impact.

Real-time notifications
Receive alerts for low toner, ink levels, and device errors, with exportable data in CSV format.

COREZA
PRINT

Coreza Print is a cost-effective, feature-rich, software-as-a-service (SaaS) print management solution that allows IT teams to quickly and effectively deploy, secure, control, and track print in the cloud.

Our mission is to make printing easy. We believe that printing should be reliable, powerful and easy to administer, and our technology is trusted by our partners, resellers, IT admins, school districts and NASDAQ listed companies, all around the world.

Ready to simplify print management?

Streamline print management from end-to-end

Solutions designed for SMB, enterprise, public sector, non-profit, and education.

Zero upfront investment

Flexible subscription pricing that scales with your business.

Round-the-clock support

Access to real human support for setup, deployment, and ongoing assistance.

See how Coreza Print helps you securely manage print in the cloud—reducing complexity, improving visibility, and giving you greater control.
